

September 18, 1985

Mr. Boyd Heslop, Commissioner
OGDEN RIVER DISTRIBUTION SYSTEM
276 West Virginia Avenue
Ogden, Utah 84404

Dear Boyd,

I am appreciative of finally receiving the 1984 annual report for the Ogden River Distribution System. Generally, the information contained is excellent in reflecting the flows and measurements of water taken by the users in the system.

There is some information, however, included in the assessment section that is somewhat misleading. Under this assessment section is a copy of the computer run with "units" for the upper users only and assessments for all of the users. Including the units used for the assessment in the report, is a good idea but these units need to reflect the uses for all users. Please coordinate in the future with Richard Pexton of our office to assure that the annual assessments match up with the total annual units used to calculate that assessment.

Thank you for your help and completing the report. If you need help or have questions, please contact me.

Very truly yours,

Kent L. Jones, P. E.
Distribution Engineer
